For example: Player A gets 3 points and player B gets 2 points, team score is 3 + 2 = 5 points.	On each <b>hole the individual stableford scores for the two-man team are multiplied to get the team score</b> . For example: Player A gets 3 points and player B gets 2 points, team score is 3 x 2 = 6 points. If a player scores 0 on a hole, the team score will be zero (anything times zero is zero)
